Career Objective

To create impactful digital solutions using my expertise in React.js, Node.js, and MongoDB. I aim to build user-centric applications, solve real-world problems, and contribute to innovative projects while honing my technical skills

Skillsets

- **Technical Skills:** HTML, CSS, JavaScript, React.js, Node.js, MongoDB, Express.js, Tailwind CSS
- **Tools:** Visual Studio Code, Git, GitHub
- **Interpersonal Skills:** Problem-Solving, Team Collaboration, Effective Communication

Projects

1. Lost and Found Application

This Lost and Found Website connects people who have lost belongings with those who've found them. Users can report, browse, and recover items. It includes features like user authentication, file uploads, database management, and API integration. The project uses React, Tailwind CSS, DaisyUI, Firebase, and MongoDB, offering full-stack development experience.

Features:

application. They can report lost or found items with detailed descriptions and images. A dynamic search functionality helps locate items efficiently. Additionally, users can directly contact finders via the platform.

Technologies Used: React.js, Node.js, MongoDB, Express.js, Tailwind CSS, Firebase
